

WOOD PROCUREMENT POLICY

Suzano Pulp and Paper is a forestry company that plants, harvests and processes eucalyptus wood. To ensure the sustainability of our business and the conscientious management of our natural capital, we adopt transparent relationships to ensure superior quality products.

With this in mind, we have made efforts to ensure that we purchase inputs only from responsible and sustainable sources that are aligned with our way of doing business.

To attest to the use of wood from responsible sources, **Suzano Pulp and Paper commits to:**

- monitor the origin of wood;
- support the highest standards of responsibility in forest stewardship;
- use wood from legal sources based on state and federal laws in the country of operations (Brazil);
- require all wood suppliers to provide evidence attesting to their compliance with requirements for ensuring the origin of products;
- conducting monitoring in the field of all wood suppliers.

Suzano Pulp and Paper also guarantees that the fibers used in our processes **DO NOT COME FROM:**

- wood produced illegally;
- wood produced in violation of traditional and human rights;
- wood from high conservation value forests threatened by stewardship activities;
- wood from forests in the process of conversion into non-forestry plantations and projects;
- wood from forests in which genetically modified trees are planted.

In this way, Suzano Pulp and Paper will continue to promote sustainable development in our processes and in our relations with clients, suppliers, stakeholders, civil society and the environment.
